

FHS St.Gallen is a dynamic university of applied sciences in Switzerland with a strong focus on innovation and quality.

The Institute for Applied Nursing Science IPW-FHS contributes to high-quality healthcare for the population. We develop evidence-based interventions, guidelines and standards for patient care, particularly addressing chronic health problems.

Our team supports nursing practice development in various areas, e.g. dementia care, palliative care, gynaecological oncology nursing, rehabilitation care, incontinence care, evidence-based nursing, patient education etc.

We offers students a chance to gain experience as

## **trainees**

for four months.

Do you study nursing or nursing science? Are you interested in research and scientific work?

During this wide-ranging practical training you will participate in the acquisition, application and realization of practice-oriented research projects. Furthermore, you have the opportunity to write a master thesis in the context of IPW-FHS projects.

### **Your responsibilities**

- Performing literature searches
- Assisting in data collection and analysis
- Assisting in projects and application procedures.

### **Your qualifications**

- Studying nursing or nursing science
- Basic knowledge of qualitative and quantitative research methods
- Good knowledge of literature search in national and international databases
- Very good knowledge of Microsoft Office (e.g., work with style sheets), Word, PowerPoint and Excel
- Flexible, independent, reliable and responsible.

### **We offer**

- Working in a team with a clinical focus
- Opportunity to develop professional knowledge
- Modern working conditions
- Location next to St. Gallen central station.

Would you like to take on this challenge? Please submit your application documents by email.
